FLY TIPPING SOLUTIONS

Making **your** community a **better** place

JEMCOM CCTV

What is **Technology** Without **Imagination**?

A cost-effective solution to an expensive problem

Introducing the JEMCOM Fly Tipping Deployment System (FTDS)

Protect your community *and* the environment with our quick and simple rapid deployment solution for fly-tipping hotspots. Fly-tipping is a crime that makes a victim of the whole community. Not only does the wildlife and environment suffer, you (the landowner) incurs huge costs in terms of time, money and energy.

The challenge

Most fly tipping hotspots are rural and therefore pose a challenge when installing traditional CCTV systems. With no access to mains power, internet supplies or any security infrastructure, fly tipping sadly remains undetected.

There is another way.

Let us help you catch fly-tippers in the moment. JEMCOM can offer an entirely unique, fully wire-free system (no mains power required) that can be rapidly deployed to fly tipping hotspots.

Initially developed as an interim solution for remote abandoned buildings and farms, the FTDS is an extremely cost-effective and quick solution to fly tipping. This battery operated, totally unique fully wire free system CCTV equipment works with all networks (uses a roaming multi SIM), up to ten 5 MegaPixel true day/night 1080p high-definition cameras can be installed, two-way audio with motion settings, local USB (if required) and Cloud Storage, remote computer or App login, full covert deployment kit and it is GPS Tracked with SMS alerts.

Simple, yet robust and highly effective.

"A revelation"

I manage a private psychotherapy practice. Time and again, we've struggled with fly tippers who use our land to dump both commercial and domestic waste. The JEMCOM Fly Tipping Deployment System is a revelation, as the motion sensor allows us to proactively monitor and respond to situations in the moment, as they happen.

Includes
**COVERT
DEPLOYMENT
KIT**

FTDS12 – Fly Tipping Deployment System 12V DC

- No mains power required for the Base Station
- Up to 100m connectivity between the camera and base
- Up to 10 cameras per base station - totally wireless
- Motion or Audio Detection instantly
- Local USB storage if required
- Cloud Storage up to 7 days FREE for 5 cameras
- Total Covert Deployment ability
- Up to 7 days battery life
- Additional linked batteries available
- Mobile Data – roaming
- Mobile WiFi – roaming
- Fully GPS Tracked Base Station
- Remote On/Off for power saving
- Covert Deployment Kit included
- App or computer login

123Ah Battery Pack

£2197 + VAT

- Rugged 123Ah lithium-ion battery power pack, in protective dust and splash-proof Peli case
- Battery type: Li-ion Cylindrical Cell 26650-7700mAh (3C)
- CE, MSDS, UN38.3 Approved
- 10A quick charge: 7-9 hours for a complete charge
- Provides back up power for 14 days
- Output current max 150A (continuous)
- Support 12V DC to AC 1800W converter (max)
- Operation voltage: Min 9V – Max 12.6V
- GPS tracker – track and remotely switch On/Off the case (with 1 years' unlimited tracking)
- 2 x power connector
- 1 x Voltmeter display
- 1 x power lead (2m)
- Leasing package available

200Ah Battery Pack

£2497 + VAT

- Rugged 200Ah lithium-ion battery power pack, in protective dust and splash-proof Peli case
- Battery type: Li-ion Cylindrical Cell 26650-7700mAh (3C)
- CE, MSDS, UN38.3 Approved
- 10A quick charge: 20–24 hours for a complete charge
- Provides back up power for 28 days
- Output current max 150A (continuous)
- Support 12V DC to AC 1800W converter (max)
- Operation voltage: Min 9V – Max 12.6V
- GPS tracker – track and remotely switch On/Off the case (with 1 years' unlimited tracking)
- 2 x power connector
- 1 x Voltmeter display
- 1 x power lead (2m)
